MINUTES OF THE 1ST MEETING OF NATIONAL SCHEME SANCTIONING COMMITTEE (NSSC) OF SBM(G) PHASE-II HELD ON 18TH AUGUST, 2020

The 1st meeting of National Scheme Sanctioning Committee (NSSC) of Swachh Bharat Mission (Grameen) [SBM(G)] Phase-II was held on 18th August, 2020 at 12.30 PM under the Chairpersonship of Secretary, Department of Drinking Water and Sanitation (DDWS), Government of India through video conferencing. The list of participants is attached at Annexure-I.

2. At the outset, Secretary (DDWS) welcomed all the participants and asked to start the discussions. Then, Shri Arun Baroka, Additional Secretary (SBM) mentioned that like in SBM(G) Phase-I, there is a provision of NSSC in SBM(G) Phase-II guidelines. The NSSC is to consider and approve Annual Implementation Plans (AIPs)/Project Implementation Plans (PIPs) of the States/UTs. Thereafter, the regular agenda items were taken-up.

3. Agenda items:

i. Confirmation of the minutes of the 53rd NSSC meeting held on 7th May, 2019
ii. Approval of Left out of Baseline (LOB) and No One is Left Behind (NOLB) toilet targets entered by the States/UTs in IMIS.
iii. Approval of AIPs of the States/UTs for 2020-21.

4. Discussions held:

4.1 Additional Secretary (SBM) initiated the discussions and informed that the Plan Appraisal Committee (PAC) in DDWS had detailed discussions with each State/UT on their AIPs 2020-21 and its observations had been communicated to each State/UT to revise the AIPs. The States/UTs have submitted the revised AIPs accordingly. It was also informed that AIPs have not been submitted by the Ladakh and Lakshadweep so far. He then made a presentation highlighting the achievements under SBM(G) Phase-I, overview of SBM(G) Phase-II, its various components and funding norms, provision preparation/approval of AIP and PIP under SBM(G) Phase-II. State-wise summary of the physical targets projected by the States/UTs in their AIPs to be funded under SBM(G) Phase-II and the projected funds requirement was also presented. The total physical targets for the activities to be funded under SBM(G) Phase-II and the total funds requirement projected by all the States/UTs for 2020-21 are as under:

25/8/2020

(a) Physical targets:

No. of IHHLs *(including balance LOB/NoLB as on 1.4.2020)*	No. of CSCs	Solid Waste Management *(No. of Villages)*	Greywater Management *(No. of villages)*	Plastic Waste Management Units *(No. of Blocks)*	GOBAR-dhan projects *(No. of districts)*	Faecal Sludge Management Plants *(No. of districts)*
91,81,481	1,31,782	1,30,514	1,31,381	2312	364	323

State-wise details are attached as Annexure-II.

(b) Funds requirement:

(Rs. in crore)

Central share	State share	15th FC	Total
15,863.89	9,338.13	8,830.13	34,032.15

State-wise details are attached as Annexure-III.

4.2 After presentation, Additional Secretary (SBM) requested the Committee to consider and approve the AIPs.

4.3 Then Secretary (DDWS) urged the participants to express their views/comments.

4.4 Shri Sanjeev Kumar, AS & FA, Department of Drinking Water and Sanitation mentioned that presently the quantum of funds available under SBM(G) for releases to the States/UTs during the current financial year is about Rs.8660 crore. He further emphasized the importance of implementation of PFMS by all the States/UTs as it will bring complete transparency and help both Centre and the States in the programme implementation. He stated that many States have come on board on PFMS but it is to be ensured that all the States/UTs are completely on board on PFMS within the next three months.

4.5 Shri Shrikant Navrekar, a non-official member of NSSC, stated that while looking at the plans for non-bio degradable waste management it is observed that major focus is on Plastic Waste and other components are not reflected. Other major components such as bio-medical waste, e-wastes, sanitary napkin and diapers, and other non-recyclable components also needs to be taken care of. He urged to guide the States on how they should proceed in this regard. He further stated that the States should also plan what to do with the end product after disposal of plastic wastes. Under Greywater Management, there may be an intermediate level between household soak pits and waste stabilization ponds like community leach pits may be constructed for group of houses. He further mentioned that there are many septic tanks which discharge black water in the open drains or open areas and its management should also be a part of Liquid Waste Management planning.

25/8/2020

4.6 Shri Rohit Kumar, Joint Secretary, Department of Rural Development stated that under MGNREGS they are supporting SBM(G) Phase-II activities in many ways. Construction of IHHLs is permissible. Unskilled labour component upto 230 man-days for construction of CSCs has also been allowed recently and a joint advisory has already been issued in this regard. Further a lot of SLWM works e.g. construction of vermi-compost pits, NADEP, Soak-pits, Leach pits, drainage channels, waste stabilization ponds etc. are also being constructed under MGNREGS. A lot of water harvesting and conservation works are also being taken up which is also promoting the overall cleanliness in the villages. He finally stated that Department of Rural Development is committed to support the programme with whatever activities permitted under MGNREGS.

4.7 Shri Manoj Kumar, Principal Secretary, Rural Development and Panchayati Raj, Govt. of Uttar Pradesh, stated that presently there is no reliable study on waste characterization in rural areas. The characteristics of wastes in rural areas are different from that of urban areas. He suggested that a study on waste characteristics for rural areas should be done. He further said that door to door collection on daily basis for such a huge population in rural areas may not be feasible and the process of managing wastes by the households, as already exist in many areas, may be continued. The ban on plastic waste upto 50 micron should be strictly enforced and other plastic wastes can be managed at block and district levels. He also informed that Uttar Pradesh is trying to strictly enforce the PFMS fully.

4.8 Shri LK Atheeq, Principal Secretary, RD & PR Department, Government of Karnataka stated that Karnataka has revised their target for Greywater Management upwards and they would like to take up about 18,000 villages during this financial year which can be covered within the financial envelop available with the State for sanitation activities.

4.9 Shri Sanjay Chahande, Principal Secretary, Water Supply and Sanitation Department, Govt. of Maharashtra stated that SBM(G) Phase-II is more of a technical programme in many ways. He raised the issue of disposal of plastic waste and stated that it needs to be tied up with various agencies for disposal. Linkages in this regard is the key problem. He also mentioned that there is need to have inventory of experts for Faecal Sludge Management (FSM) right from the Central level to lower level. SBM(G) Phase-II provides only capital expenditure and the issues of day to day revenue expenditure, skills, viability are the key areas where expertise is needed.

4.10 Addl. Secretary (SBM) stated that the observations/views expressed by the members have been noted.

25/8/2020

4.11 Thereafter, Secretary, DDWS made his final remarks. He complimented the States/UTs for the commendable works done under Swachh Bharat Mission (Grameen) in achieving ODF status. He stated that it is going to be even more challenging in the 2nd Phase of the programme. ODF sustainability is still the most critical part of the programme in terms of plugging the gaps or enhancing capacity and continuing IEC. After ensuring ODF sustainability, there comes a transition to broader definition of Swachhata in terms of ODF-Plus which is also very critical. There will be issues of plastic waste management and the States should have the local models that works and anything should not be enforced from above. There will be thrust on organic waste management especially on GOBAR-dhan. Regarding greywater management, he stated that it requires close convergence with Jal Jeevan Mission (JJM) as a lot of tap water connections are being given under JJM resulting in generation of large quantity of greywater which needs to be managed. Secretary, DDWS also stated that a lot of retrofitting is required to address the issue of black water overflowing from septic tanks.

5. Approval

5.1 After detailed deliberations, the Committee approved the following:

(i) Total LOB and NOLB households entered by the States/UTs in IMIS;

(ii) Total No. of IHHLs for 2020-21 (including the balance LOB and NOLB IHHLs) as projected by the States/UTs in their AIPs;

(iii) Physical targets for all other ODF Plus activities relating to Construction of Community Sanitary Complexes (CSCs), Solid Waste Management (biodegradable and non-biodegradable), Liquid Waste Management, Faecal Sludge Management, etc., as projected by the States/UTs in their AIPs 2020-21;

(iv) Funding support for the projected activities for 2020-21 will be as per funding norms prescribed under SBM(G) Phase-II guidelines subject to availability of funds.

5.2 The minutes of the 53rd NSSC meeting held on 7th May, 2019, were circulated vide letter no. S-11019/3/2015-SBM-Parrt-1, dated 24.05.2019 earlier. No comments were received from any State/UT in this regard. The Committee, therefore, confirmed the Minutes.

6. The meeting ended with thanks to the chair.
